

MIRIAM DR. KIRMAYER

AV Requirements

COMPUTER, PROJECTORS AND DISPLAYS

Unless otherwise discussed, Dr. Miriam provides her own Apple MacBook Pro 13" running macOS Sonoma 14.0 with Thunderbolt 3 (USB-C). HDMI is also available via an included Apple USB-C Digital AV Multiport Adapter. Dr. Miriam's presentation is presented from her computer using a 16:9 display ratio at 3840 by 2160. Client must provide a DSAN Perfect Cue system (or equivalent) for Dr. Miriam's direct slide control.

MICROPHONE

Dr. Miriam strongly prefers a wireless lavalier microphone connected to a professional audio system. Dr. Miriam is happy to facilitate a Q&A after the presentation. Depending on the venue and audience size, this works best if there are **additional wireless microphones** and **runners** available for audience members during this time. Moderation for virtual events to be discussed prior to the event.

AUDIO

Audio can be output from Dr. Miriam's MacBook Pro via the Thunderbolt 3 / USB-C ports or a standard 3.5mm analogue headphone jack.

AV TESTING / SOUNDCHECK

Dr. Miriam requires an A/V check no fewer than 30 minutes before taking the stage.

CONFIDENCE MONITORS

Dr. Miriam strongly prefers at least one confidence monitor, if possible. A visible clock is also appreciated.

NO PODIUM

Dr. Miriam prefers no podium on stage. If one must be present, please push it back or place it to one side of the stage so she may walk in front of it freely.
